COMPANY PROFILE

Industrial Aluminum Profile Accessories

Wholesale Supply & Consolidated Sourcing

Aluminum profile accessories for distributors and industrial buyers.

Dongguan Sinsdar Automation Technology Co., Ltd.

CONNECTION / FASTENING / FINISHING

About Sinsdar

Founded in 2024 in Dongguan, China, Sinsdar combines industrial aluminum profile accessory supply with profile machining and custom frame assembly.

Our founder brings nearly 20 years of industry experience.

International buyers

Wholesale accessory supply and consolidated sourcing through specialized manufacturing partners in China.

Domestic projects

Custom frames, machining and assembly for equipment bases, workbenches and protective enclosures.

Domestic frame fabrication and assembly

Connection & Fastening Accessories

Components for joining profiles and mounting accessories

Brackets & Connection Plates

Corner brackets and plates for profile joints. Select the joint layout, fixing positions and required dimensions.

Specialized & Internal Connectors

Connectors for internal, end and extension joints. Confirm profile geometry and any required machining.

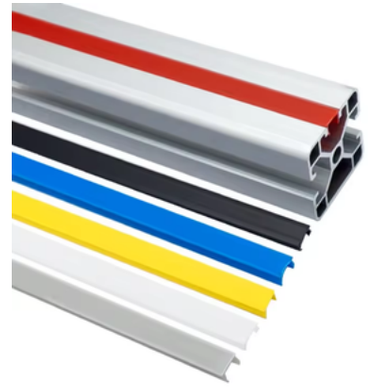
T-Slot Nuts & Bolts

Fasteners in different installation types. Confirm slot opening, thread size and critical dimensions.

Our current range primarily covers Metric/European-system products. Compatibility requires verification against the actual profile and dimensions.

Hinges, Handles & Finishing Accessories

Components for doors, access panels, profile ends and slots



Industrial Hinges

Hinges for doors and access panels. Confirm mounting arrangement, hole spacing and required movement.

Handles & Door Accessories

Handles, catches, stops and related fittings. Confirm mounting dimensions and intended use.

End Caps & Cover Strips

Components for profile ends, slots and panel fitting. Selection depends on the actual profile geometry.

Product sizes and variants differ. Browse the linked categories or send your drawings and requirements for review.

Multiple Categories. One Sourcing Contact.

Send a single-item enquiry or a multi-item bill of materials (BOM). We coordinate requirements, purchasing and export order consolidation.

Multi-category purchasing

Include different accessory categories in one RFQ. We confirm quantities and supply terms for each item.

Specification & drawing review

Share product codes, dimensions or drawings to clarify the requested items before quotation.

Beyond the online catalogue

Send a description or reference image. We review sourcing possibilities for the specific request.

Consolidated export orders

Combine purchases across product categories under an agreed order and shipping arrangement.

Packaging requirements

OEM packaging and private-label options follow the product and agreed requirements.

Order Coordination & Incoming Checks

01 **Share requirements**

Product codes, quantities, drawings or a BOM.

02 **Confirm specifications**

Review variants, dimensions and sourcing requirements.

03 **Review the quotation**

Agree price, documents and delivery arrangements. Samples can be arranged separately.

04 **Coordinate supply & checks**

Coordinate purchasing and incoming batch checks.

05 **Consolidate the order**

Bring products together under the agreed export arrangements.

Inspection & Documentation

Every incoming batch handled by Sinsdar receives basic visual and selected dimensional checks.

Batch-level checks do not mean 100% inspection of every unit. Sampling and acceptance criteria follow the agreed requirements.

Material certificates can be requested from suppliers but are not held for every product. Third-party testing may be arranged, subject to confirmation.

Domestic Frame Fabrication & Assembly

Equipment frames, workbenches, protective enclosures and related structures

Frame structures

Cut profiles

Machined profiles

Layout & profile selection

Frame layouts and profile selection follow customer requirements and drawings.

Cutting & machining

Cutting, drilling, tapping and milling follow the confirmed project scope.

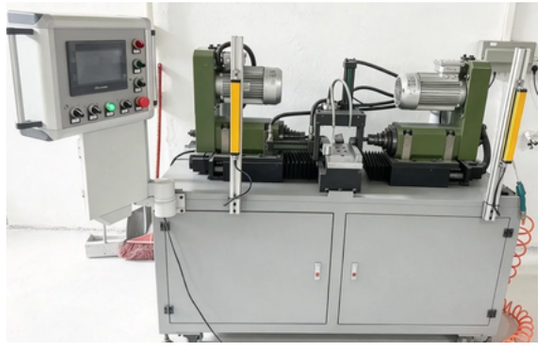
Assembly & components

Frame assembly includes the required accessories and supporting components.

Machining Equipment & Workshop

Aluminum profile cutting saw

Profile CNC machining center



Profile drilling equipment

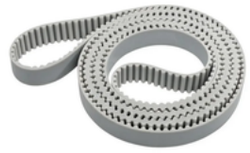
Vertical machining center

These photographs show our profile machining and frame fabrication business. Export accessories come from specialized manufacturing partners.

Domestic Automation Components

Alongside frames and assembly accessories, we supply automation components for domestic projects.

Timing pulleys



Timing belts

Cable chains

Shaft couplings

Bearings

Guide shafts

Other domestic items include lead screws, linear guides and custom machined parts. International sourcing requests are reviewed individually.

Accessories in Profile Assemblies

Examples of connection, mounting and movement

Frame connections

Joining plates and brackets connect profiles according to the joint layout and fixing positions.

Doors & access panels

Hinges and related fittings support the selected mounting and opening arrangement.

Mobile frames & workstations

Casters and leveling components form part of our domestic assembly accessory range.

These are typical uses, not customer case studies. Suitability and structural requirements must be verified for the complete assembly.

Preparing Your Enquiry

Send what you have. We can clarify the remaining details together.

01 Product identification

Product name, Sinsdar code, drawing or reference image.

02 Dimensions & fit

Profile series, slot opening, thread size, hole spacing and other critical dimensions.

03 Quantities

Required quantity for each item.

04 Product requirements

Required material, finish or other specification, for availability review.

05 Packaging & documentation

Labeling, inspection criteria and any required certificates or test reports.

06 Delivery requirements

Destination and requested schedule, for review with the quotation.

A spreadsheet or BOM is welcome. Email sales@sinsdar.com
